

EXHIBIT V OTHER SUPPORT

Below is a suggested format to be used when providing the listing of other support for each Center Investigator participating in this grant. This listing should reflect currently active support related to environmental health science research followed by pending projects.

1. (Investigator Name) - This should be the full name of the Center Investigator as listed in the grant application.
2. (Center Grant Support) - This item should reflect the total support for the named Center Investigator, showing total percentage of time/effort and total amount of salary support from the Center Grant.
3. (Other NIEHS Support) - This item should list the support this Center Investigator receives from NIEHS other than directly from the Center Grant. Included in this item should be the complete grant/mechanism number (e.g., 5 R01 ES01234-01), the complete title of the grant/mechanism, the full title of the supporting organization, and the project period dates for that grant/mechanism. For each grant/mechanism listed, you will need to show the total amount of support, the specific cost of that investigator's project, and the investigator's per cent effort and salary support from that source.
4. (Other NIH Support) - This item should list the support this Center Investigator receives from NIH other than directly from NIEHS. Included in this item should be the complete grant/mechanism number (e.g., 5 R01 HL01234-01), the complete title of the grant/mechanism, the full title of the supporting organization, and the project period dates for that grant/mechanism. For each grant/mechanism listed, you will need to show the total amount of support, the specific cost of that investigator's project, and the investigator's salary support from that source.
5. (Other Federal Support) - This item should list the support this Center Investigator receives from Federal sources other than NIH. Included in this item should be the complete grant/mechanism number, the complete title of the grant/mechanism, the full title of the supporting organization, and the project period dates for that grant/mechanism. For each grant/mechanism listed, you will need to show the total amount of support, the specific cost of that investigator's project, and the investigator's per cent effort and salary support from that source.
6. (Non-Federal Support) - This item should list the support this Center Investigator receives from sources which are not Federal agencies. Included in this item should be the complete grant/mechanism number, the complete title of the grant/mechanism, the full title of the supporting organization, and the project period dates for that grant/mechanism. For each grant/mechanism listed, you will need to show the total amount of support, the specific cost of that investigator's project, and the investigator's per cent effort and salary support from that source.

Finally, please total each of the categories i.e., total grants, effort, and salaries.
